

Policy, Guidelines, and Procedures for Society and Commission Awards, as adopted by the Council effective 9 January 2000 (Amended 17 May 2004 and 26 April 2010)
This version accepts changes up to 28 July 2011.

A. General

Recognition by the Society or its Commissions for outstanding achievement or contribution shall be conferred through one of two means: (1) Society Awards, including Lectureships, and (2) Commission Awards, which include Named Student Prizes and Board/Committee Awards.

A full listing and descriptions of the Society Awards, and named Student Prizes are available on our website, www.ametsoc.org/awards.

The following general principles apply with respect to both Society and Commission Awards.

1. All final decisions on the creation of a Society or Commission Award—its purposes, terms of reference, and conditions—are made by the AMS Council. In the case of Commission Awards, once generic terms of reference that covers the purpose and conditions of a Commission's Awards are approved by the Council, the Commissioner can then approve specific terms of reference for individual awards under the Commission.
2. All final decisions on the recipients of Society Awards are made by the AMS Council. Recipients of Commission Awards are not approved by the AMS Council but by the authority identified in the terms of reference for these Awards.
3. The Council has established an Awards Oversight Committee (AOC) as a committee of the Executive Committee (EC) to assist in its deliberations. The AOC is chaired by the most immediate Past-President and includes as members the President, the President-elect, the Chairs of the Atmospheric Research Awards Committee and the Oceanographic Research Awards Committee, and the heads of the five AMS Commissions that oversee awards.
4. Society Awards are to be maintained at the highest level. While an award winner or lecturer may be chosen annually, it may often be more suitable to present the award only occasionally, and an award committee should not hesitate to pass over a year when there is

no outstanding nominee. Justification is required if, in an exceptional case, multiple awards are recommended to the Council.

5. Cash prizes associated with Society Awards must be significant. All named cash prizes, including Named Student Prizes, should be endowed. Named Student Prizes should have equivalent value. The AOC will have review authority in establishing a cash prize, with a recommendation going forward to the EC and Council for final approval. Awards with cash prizes, including the selection process for such awards, will be periodically reviewed by the EC to ensure the Council's intentions are being satisfied.
6. All Society and Commission Awards will be considered for renewal or termination by the Council every eight years.

B. Establishing Society Awards and Named Student Prizes

1. Society Awards are established only when there is clear justification.
2. Society Awards may be named or unnamed.
3. Society Awards and student prizes are named only for deceased members of the Society who are deserving of such recognition.
4. A proposal for a new Society Award or Named Student Prize may be submitted to the Secretary-Treasurer, American Meteorological Society, 45 Beacon Street, Boston, MA 02108, by any member or group of the Society. The proposal, not to exceed five pages in length, shall include sufficient background and justification indicating, for example, that the pool of potential awardees is large enough and the scope is sufficiently unique and worthy to justify the new award or lectureship. Additional letters of support from relevant portions of the affected community will be welcome. The proposal shall also include suggested Terms of Reference and the method for selection of awardees.
5. Proposals for a new Society Award or Named Student Prize will be reviewed by the AOC. When appropriate, the AOC will request input and comments from other segments of the Society.
6. The AOC will recommend a course of action to the Council.

C. Society Award Nomination Procedures (other than Lectureships)

1. Nominations must be submitted electronically to our website, www.ametsoc.org/awards/.
2. The nomination is to include a proposed citation of 25 words or less; a nomination letter not to exceed three pages; a curriculum vitae of no more than two pages; a bibliography limited to at most three pages; and three letters of support, each no longer than three pages. Awards committees give the highest consideration to letters received from institutions unrelated to that of the nominee.
3. With the exception of the Suomi Award, nominations will remain active for three years, and updated information may be submitted for consideration in the second and third year. Nominations for the Suomi Award will remain active for four years, with updated information possible in the second, third, and fourth year.
4. *The deadline for nominations is May 1.*

D. Society Award Nomination Procedures: Lectureships

1. A nomination form for Lectureships is available on our website, www.ametsoc.org/awards/. Nominations should be submitted to the Chair, Awards Oversight Committee, American Meteorological Society, 45 Beacon Street, Boston, MA 02108.
2. The nomination is to include a proposed citation of 25 words or less, and three letters of support, each no longer than one page.
3. Nominations will remain active for three years.
4. *The deadline for nominations is October 1.*

E. Selection Procedures for Society Awards

All awardees and lecturers are approved by the Council and receive a certificate.

Recommendations for Society Awards are made by the various committees described in the relevant Award Descriptions (see ametsoc.org/awards/descriptions/index.cfm). Some awards and lecturers have additional special procedures outlined below. The AOC makes recommendations to the EC and Council for the Abbe, Brooks, Simpson, Corporation, and Special Awards. To coordinate the awards process and ensure the consistency and quality of awards, the AOC also reviews the recommendations for all other Society Awards, except honorary membership, prior to their submission to the EC and Council for approval. Society Awards recommended by the Atmospheric and Oceanographic Research Awards Committees are

forwarded by their Chairs. For Society Awards recommended by the Commissions, the Commissioner oversees the process and forwards the results to the AOC.

SPECIAL PROCEDURES

- Atmospheric Research Awards (ARA) Committee

The Clarence Leroy Meisinger Award and The Henry G. Houghton Award:

These early career awards are intended to recognize scientists who are within ten years of having earned their highest degree or are under 40 year of age when nominated. Consideration will also be given, however, to those who are still in the early stage of their careers but have seen these interrupted for up to 5-10 years by family leaves, military service, and the like.

- Oceanographic Research Awards (ORA) Committee

The Nicholas P. Fofonoff Award:

This early career award is intended to recognize scientists who are within ten years of having earned their highest degree or are under 40 year of age when nominated. Consideration will also be given, however, to those who are still in the early stage of their careers but have seen these interrupted for up to 5-10 years by family leaves, military service, and the like.

- Awards Oversight Committee (AOC)

The Award for Outstanding Services to Meteorology by a Corporation:

All three letters of reference or support shall come from individuals not affiliated with the nominated corporation.

- Education & Human Resources Commission (EHR)

The Teaching Excellence Award: The AMS Board for Higher Education (BHE), in consultation with the Commissioner for Education and Human Resources, is responsible for overseeing the award process and forming the selection committee. The selection committee, not fewer than five members, shall be composed of faculty members from both undergraduate and graduate institutions, at least one current member of the BHE, and, as an option, an active student AMS member. The selection committee will forward its recommendation (with a copy to the chair of the BHE) to the Commissioner.

The Award for Distinguished Science Journalism in the Atmospheric and Related Sciences: The AMS Board on Outreach and Public Education (BOPE) in consultation with the Commissioner for Education and Human Resources is responsible for

overseeing the award process and forming the selection committee. The selection committee, not fewer than five members, shall be composed of scientists, educators, and journalists, at least one current member of the BOPE, and the Education and Human Resources Commissioner. The selection criteria are to include consideration of balance of the media type over time. The successful nomination will be reviewed by the STAC Commissioner for the quality of its scientific content. Only one recipient may be selected.

- Professional Affairs Commission (PAC)

The Award for Excellence in Science Reporting by a Broadcast Meteorologist: The Committee on the Station Scientist submits a recommendation for this award to the Board of Broadcast Meteorology, which reviews it and then makes a recommendation to the AMS Commissioner on Professional Affairs.

The Award for Broadcast Meteorology. The Board of Broadcast Meteorology serves as the selection committee. Nominations can come from an individual or group, and should be accompanied by examples of the individual's work, such as an audio/video tape of an event, or a composite tape of the individual's career work. Single event nominations must be based on extraordinary work during a demanding weather event. Although the Award is normally intended for an individual, under special circumstances, it may be awarded in recognition of a team effort.

The Henry T. Harrison Award for Consulting Meteorology. The Board for Certified Consulting Meteorologists makes a recommendation to the AMS Commissioner on Professional Affairs.

- Publications Commission

The Editor's Award: The Publications Commissioner oversees a process in which the journals' Editorial Boards recommend individuals for outstanding service to the journals. The service generally takes the form of providing exceptional reviews in a timely fashion or providing reviews of difficult papers. Other forms of service are also recognized including providing Editors advice about disparate reviews and adjudicating

controversies between reviewers and authors. Each journal nominates at least one individual per year, but additional awards can be given for journals with high submission rates based on a formula that equates one award for each 500 submissions each year. The total number of Editor's Awards is currently capped at 15, one for each of the ten journals, plus 5 because the total journal submissions were about 2500 in 2009.

- Scientific and Technological Activities Commission (STAC)

The Francis W. Reichelderfer Award: The STAC Commissioner, in consultation with the Professional Affairs Commissioner, is responsible for overseeing the award process and forming the selection committee. The selection committee is composed of a chair and two members from the Weather Analysis and Forecasting Committee, two members of the Board for Operational Government Meteorologists, one member from the Hydrology Committee, and one member from the Coastal Environment Committee.

The Helmut E. Landsberg Award: The AMS Board on the Urban Environment serves as the selection committee.

The Award for Outstanding Achievement in Biometeorology: The AMS Board on Atmospheric Biogeosciences serves as the selection committee, with input from the Chair of the Agricultural and Forest Meteorology Committee.

The Charles L. Mitchell Award: The AMS Committee on Weather Analysis and Forecasting serves as the selection committee.

The Exceptional Prediction Award: The AMS Committee on Weather Analysis and Forecasting serves as the selection committee.

The Banner I. Miller Award: The Banner I. Miller Award is presented for an outstanding contribution to the science of hurricane and tropical weather forecasting published in a journal with international circulation during the 48 months prior to the November 1st deadline for nominations. The award is presented at each Conference on Hurricanes and Tropical Meteorology. Recommendations are prepared by the STAC Committee on Tropical Meteorology and Tropical Cyclones.

The Bernhard Haurwitz Memorial Lecturer: The STAC Commissioner is responsible for forming the selection committee. The selection committee, composed of a five-person panel including the Commissioner as chair, two members from the Atmospheric and Oceanic Fluid Dynamics Committee, one member from the Middle Atmosphere Committee, and one member from the Committee on Climate Variability and Change.

The Robert E. Horton Lecturer: Nominations are considered by the STAC Committee on Hydrology.

The Walter Orr Roberts Lecturer: Nominations are considered by a committee of the STAC Commission, convened annually by the STAC Commissioner.

F. Commission Awards

- *Named Student Prizes*
 - Named Student Prizes shall be called the “XXXX Student Prize.” Hence the four current such prizes shall be named the Robert Leviton Student Prize, the Max A. Eaton Student Prize, the Spiros G. Geotis Student Prize, and the Peter V. Hobbs Student Prize.
 - The procedure for setting up a Named Student Prize is the same as for Society Awards.
 - Named Student Prizes should be endowed at a level consistent with the cash award.
 - Unless the selection and presentation of the prize are made at the same conference, named student prizes need to be approved by the Commissioner.

- *Board/Committee Awards:*
 - Board/Committee Awards should be designated as “the xxxx Board/Committee Award,” to clarify these are Commission-level, rather than Society, awards.
 - Board/Committee Awards cannot be named for an individual and should not include a monetary prize.

- The Commissioner should establish written terms of reference for Board/Committee Awards, reviewed by the Council every eight years. These terms of reference should list the general purpose and conditions for awards, such as for an exceptional career or accomplishment, with provisions for extraordinary cases.
- Board/Committee Awards shall consist only of an AMS-provided certificate.

G. Policy on Named Conferences/Symposia/Sessions and Special Issues of AMS Journals, as adopted by the Council effective 25 September 1999. (Amended 9/09)

Recognition of scientists in the fields served by the AMS, living or deceased, in the form of a named conference or symposium or a named special issue of one of the Society's journals is an honor reserved for only the most outstanding of our colleagues. It should be awarded only to those individuals who are completing a career, or who have recently died having completed a career, of significant achievements in their field and whose contributions would make them worthy of consideration for Honorary Member of the AMS.

Proposals for either a named conference/symposium or special issue, including the nature of the content for the conference/symposium or special issue that justifies its naming, should be submitted to the STAC Commissioner or Publications Commissioner, respectively. A nomination form is available on the AMS website (www.ametsoc.org/awards/). The Commissioner will utilize the Commission membership, with particular weight being given to the input from the affected STAC Committee or journal editorial board, to review the proposal and provide recommendations. The Commissioner will forward those proposals deemed appropriate to the AOC prior to a final decision by the Council.

Proposals for named conferences and symposia organized outside the STAC structure (such as the IIPS Conference or Education Symposium) will still be handled by the STAC Commissioner, but with considerable input from the organizing committee of the affected meeting and possibly other Commissions, Committees, or Boards as deemed appropriate by the STAC Commissioner. Final approval lies with the AMS Council.

A named session honoring an individual may be held within an existing specialty conference or symposium on the recommendation of the STAC Commissioner and approval by the Executive Committee. Except for extraordinary circumstances, there should be a limit of two special sessions per specialty conference.

Recognition in the form of a named special issue of a journal should be made infrequently, and as a guideline, a particular journal should have an issue named after an individual no more frequently than about once every three years. A conference/symposium that is part of an existing series should be named after an individual no more frequently than about once every three meetings for that conference or symposia series. Special named symposia that are not part of a series can be organized for the AMS Annual Meeting, but no more than two should occur at any annual meeting.

The deadline for nominations is May 1, except for special sessions at specialty conferences, which should be made xx months prior to the conference.

H. Guidelines for memorials were adopted by the Council on 29 January 1978.

A memorial is defined as a gift, award, publication, or activity that is accepted or created by action of the Society for the purpose of perpetuating the memory of a person or group of persons. Honorary membership and awards, which are normally bestowed for the purpose of honoring living persons, are not to be construed as memorials under these guidelines.

1. Memorials shall be established by action of the Council.
2. Memorials shall normally be established only for nonliving persons. There shall be no exclusions based on membership in the Society, nationality, race, religion, or sex.
3. Memorials shall satisfy both of the following criteria:
 - a) The accomplishments and ideals of the person being memorialized shall have been such as to advance the aims of the Society.
 - b) The objective of the memorial, be it an award, scholarship, publication, or other activity, shall be such as to advance the aims of the Society.
4. Memorials shall be considered in two categories: designated and undesignated.
 - a) Designated memorials are normally established for a specified object in such a way as to memorialize an individual or group of individuals. If the memorial is in the nature of a periodic payment or award, sufficient capital will normally be provided to fund the award over the stated duration of the memorial.
 - b) Undesignated memorial gifts may be accepted by the Society to be used in ways and for purposes to be determined by the Council, including the amalgamation of several such memorials for a specific purpose.

5. The designation of memorials to provide scholarships for the assistance of meteorology students at academic institutions is encouraged.
6. The use of memorial funds to publish a special volume or monograph is encouraged.
