

Climate Change Forum

MARYLHURST UNIVERSITY

Clark Commons

Free and open to the public

To reserve a seat, e-mail jdabrowski@marylhurst.edu

Saturday, October 8, 2005, 9AM to 4PM

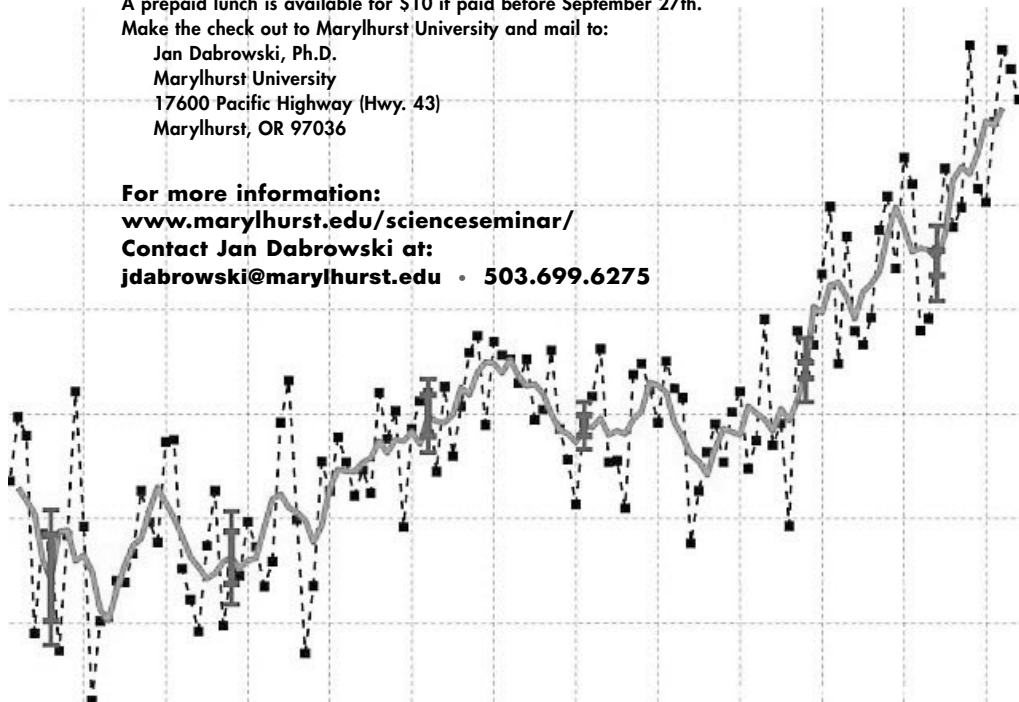

Learn how a warmer earth's atmosphere is impacting marine ecosystems and agriculture, causing changes in animal and plant habitats and shrinking polar ice. This one-day forum features prominent Pacific Northwest scientists and researchers speaking about their areas of climate study from the Antarctic to the Arctic.

This forum is designed for those interested in learning about climate science, from those conducting the research.

A prepaid lunch is available for \$10 if paid before September 27th.
Make the check out to Marylhurst University and mail to:

Jan Dabrowski, Ph.D.
