RESEARCH ♦ APPLICATIONS ♦ HISTORY

The American Meteorological Society (AMS)  
is pleased to announce the newest title from AMS Books

### **THE CALLENDAR EFFECT**

BY JAMES RODGER FLEMING

*Available November 13, 2006*

This is the untold story of the remarkable scientist who established the carbon dioxide theory of climate change. Guy Stewart Callendar discovered that global warming could be brought about by increases in the concentration of atmospheric carbon dioxide due to human activities, primarily through burning fossil fuels. He did this in 1938! Using never-before-published original scientific correspondence, notebooks, family letters, and photographs, science historian James Rodger Fleming introduces us to one of Britain's leading engineers and explains his life and work through two World Wars to his continuing legacy as the scientist who established *The Callendar Effect*.

The companion DVD, sold separately, is a research-quality digital archive of Callendar's letters, journals, documents, and family photographs. It contains more than 6,700 images and includes extensive weather and climate data. It is an essential tool for historians, climate scientists, and other scholars, and is a desirable acquisition for libraries.

### **The Callendar Effect: The Life and Work of Guy Stewart Callendar (1898–1964), the Scientist Who Established the Carbon Dioxide Theory of Climate Change**

By James Rodger Fleming

© 2007, 176 pages hardcover

ISBN 10: 1-878220-76-4; ISBN 13: 978-1-878220-76-9

List: \$34.95; Member: \$24.95; AMS Order Code: CLDR

### **The Papers of Guy Stewart Callendar (Electronic Edition on DVD)**

Edited by James Rodger Fleming and Jason Thomas Fleming

© 2007, DVD

List: \$55; Member: \$40; AMS Order Code: CLDR DVD
