

Lockheed Martin

Lockheed Martin is a global security and aerospace company that employs approximately 100,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services. This year the company received three Edison Awards for ground-breaking innovations in autonomy, satellite technology and directed energy.

Lockheed Martin's Marion, Massachusetts facility has a proud heritage of more than 60 years in the development and production of specialized instrumentation for environmental observations. Hundreds of customers around the world including NOAA, all U.S. Department of Defense agencies, and meteorological/oceanographic services rely on our expendable instrumentation to understand global climate challenges. Lockheed Martin Marion provides advanced GPS upper air sounding systems for synoptic and research atmospheric measurements from the surface to the upper atmosphere. Our oceanographic instrumentation and data acquisition systems enable users to obtain real-time profiles of ocean temperature, current velocity and salinity.

Lockheed Martin is proud to support the American Meteorological Society and its AMS Freshman Undergraduate Scholarship Program. We wish this year's recipients all the best
