

The Liv and Walt Lyons Scholarship is provided by Liv and Dr. Walter A. Lyons, CCM. After receiving a Ph.D. from the University of Chicago (under Professor Ted Fujita), Walt's career spanned teaching at the University of Wisconsin-Milwaukee, broadcasting, and then private consulting. Joined by Liv (a teacher and program administrator), he engaged in forensic meteorology and research in mesoscale processes and atmospheric electricity. Echoing his mentor, Walt encourages students to delve into the observations and think outside that box of conventional wisdom. The \$2500 endowed undergraduate scholarship is awarded annually.
