

The Bernard Vonnegut and Vincent Schaefer Endowed Scholarship

The Bernard Vonnegut and Vincent Schaefer Endowed Scholarship honors two individuals who worked as colleagues and were friends over many years, and who made significant contributions to science and meteorology. In addition to their outstanding scientific contributions, those who knew Bernie and Vince, knew of their zest for learning and discovery that carried through their entire lives, and equally important, the positive outlook and encouragement that they conveyed to so many young people and all of their students. To honor these two individuals and their contributions to the sciences and education, the Vonnegut/Schaefer Endowed Scholarship was established and funded by Bernie and Vince's many friends, colleagues, students and others touched by their lives
