EARLY CAREER LEADERSHIP ACADEMY

The American Meteorological Society recognizes the importance of investing in early career professionals. The **AMS Early Career Leadership Academy (ECLA)** provides workforce development support in the future of leadership across the weather, water, and climate enterprise.

This summer ECLA will bring professionals together from diverse disciplines and backgrounds to develop skills in leadership, communication, and creative problem solving. Your company is invited to be a part of this essential experience.

The American Meteorological Society will host the next Early Career Leadership Academy (ECLA**)** at an in person meeting taking place in conjunction with the **2026 AMS Madison Summit**. This is your company's opportunity to support workforce development, engage directly with attendees, and help create a lasting experience and positive impression of your company during the August 3–5, 2026, program in Madison, Wisconsin.

"The AMS Early Career Leadership Academy has had a major impact on my life and furthering my career. ECLA has given me the opportunity to grow as a leader through unique experiences, expand my professional network, and create a supportive community of lifelong friends. I would not be where I am today without the support and opportunities I've had through ECLA." *-Alex*
