

December 7, 2017

The Honorable Orrin Hatch
Chairman
Senate Finance Committee
Washington, D.C. 20510

The Honorable Ron Wyden
Ranking Member
Senate Finance Committee
Washington, D.C. 20510

The Honorable Kevin Brady
Chairman
House Ways & Means Committee
Washington, D.C. 20515

The Honorable Richard Neal
Ranking Member
House Ways & Means Committee
Washington, D.C. 20515

Dear Senator Hatch, Senator Wyden, Representative Brady and Representative Neal:

The undersigned organizations represent a broad spectrum of scientific and engineering societies. Together we represent millions of scientists, mathematicians and engineers from around the world, including students studying at U.S. universities and colleges. Now that the Senate and House are conferencing on tax reform, we wanted to reiterate our concern with provisions in the House version of the Tax Cuts and Jobs Act (H.R. 1) that will increase the financial burden for graduate students by repealing existing provisions in tax law.

While the goal of tax reform is to help grow the U.S. economy, the language to repeal the student loan interest deduction, graduate student tuition waivers, the Hope Scholarship Credit, the Lifetime Learning Credit and educational assistance programs ultimately will have the opposite effect. By making advanced education less affordable, it is likely to drive some students away from seeking higher education. Because a majority of graduate students are in the key areas of science, technology, engineering, and math (STEM), these provisions will have an outsized impact in the sciences.

U.S. scientific and technological ingenuity has helped to make our nation one of the most innovative in the world and generated tremendous economic benefit to our country. This inventive spirit starts with people and ideas – and it is our higher-education system that has fostered the development of inventors, entrepreneurs, Nobel Laureates, and business leaders. Repealing the very provisions that allow graduate students to continue to study in critical STEM fields means that we will be shutting the door on new opportunities for discovery, exploration and innovation.

For these reasons, we urge you to preserve the critical graduate student tax benefit provisions, especially sections 117(d), 117(d)(5), and 127.

Sincerely,
