## Preface

Ocean Studies and Pedagogy

Acknowledgments

## IC. Introductory Chapter

IC.1 Why the Ocean is Important to Us?

IC.1.1 Biological Resources

IC.1.1.1 Fisheries

IC.1.1.2 Other Biological Resources

IC.1.2 Transportation, Trade, and Military Use

IC.1.3 Offshore Oil and Gas

IC.1.4 Methane Hydrates

IC.1.5 Minerals and Freshwater

IC.1.6 Recreation, Aesthetics, and Endangered Species

IC.1.7 Energy

IC.1.8 Waste Disposal

IC.2 The Ocean and the Origins of Life

IC.3 The Ocean and Earth's Environment

IC.4 Humans and the Ocean

## 1. The Ocean in the Earth System

1.1 Introduction

1.2 Earth as a System

- 1.2.1 Hydrosphere
  - 1.2.2 Atmosphere
  - 1.2.3 Geosphere
  - 1.2.4 Biosphere
  - 1.3 The Ocean in the Global Water Cycle
  - 1.4 Observing the Ocean
    - 1.4.1 In situ Monitoring of the Ocean's Depths
    - 1.4.2 Remote Sensing by Satellite
  - 1.5 Modeling the Ocean
- 

## **2. Ocean Basins and Plate Tectonics**

- 2.1 Introduction
  - 2.2 Distribution of the World Ocean
  - 2.3 Oceanic Crust and Continental Crust
  - 2.4 Plate Tectonics and Ocean Basin Features
    - 2.4.1 Evidence for Plate Tectonics
    - 2.4.2 Divergent Plate Boundaries
    - 2.4.3 Convergent Plate Boundaries
    - 2.4.4 Transform Plate Boundaries
    - 2.4.5 Mantle Convection and Sea Level
    - 2.4.6 Hot Spots
    - 2.4.7 Hydrothermal Vents
  - 2.5 Ocean Bottom Profile
    - 2.5.1 Continental Margins
  - 2.6 Spreading and Closing Cycles
- 

## 3. Properties of Ocean Water

- 3.1 Introduction
  - 3.2 The Unique Water Molecule and its Hydrogen Bond
  - 3.3 Physical Properties of Ocean Water
    - 3.3.1 Heat Properties
    - 3.3.2 Density
    - 3.3.3 Pressure
    - 3.3.4 Sound Transmission
  - 3.4 Chemical Properties of Seawater
    - 3.4.1 Water as a Solvent
    - 3.4.2 Salinity
    - 3.4.3 Residence Time
    - 3.4.4 Variations in Salinity
    - 3.4.5 Dissolved Gases
    - 3.4.6 Seawater pH and Ocean Acidification
- 

## 4. The Atmosphere and Ocean

- 4.1 Introduction
- 4.2 Weather and Climate
- 4.3 Heating and Cooling Earth's Surface
  - 4.3.1 Solar Radiation
  - 4.3.2 Solar Radiation Budget
  - 4.3.3 Solar Radiation and the Ocean
  - 4.3.4 Infrared Radiation and the Greenhouse Effect
- 4.4 Heating Imbalances: Earth's Surface versus Atmosphere
  - 4.4.1 Latent Heating
  - 4.4.2 Sensible Heating
- 4.5 Heating Imbalances: Tropics versus High Latitudes

- 4.5.1 Heat Transport by Ocean Circulation
  - 4.5.2 Heat Transport by Air Mass Exchange
  - 4.5.3 Heat Transport by Storms
  - 4.6 Meridional Overturning Circulation
  - 4.7 Circulation of the Atmosphere: The Forces
    - 4.7.1 Pressure Gradient Force
    - 4.7.2 Coriolis Effect
  - 4.8 Circulation of the Atmosphere: Patterns of Motion
    - 4.8.1 Planetary-Scale Circulation
    - 4.8.2 Synoptic-Scale Weather Systems
- 

## 5. Ocean Currents

- 5.1 Introduction
- 5.2 Ocean's Vertical Structure
- 5.3 Ocean in Motion: The Forces
  - 5.3.1 Ekman Transport
  - 5.3.2 Upwelling and Downwelling
- 5.4 Wind-Driven Surface Currents
  - 5.4.1 Gyres
  - 5.4.2 Equatorial Currents
  - 5.4.3 Boundary Currents
  - 5.4.4 Ocean Eddies
- 5.5 Monitoring the Ocean Depths
- 5.6 Large-Scale Ocean Circulation
  - 5.6.1 Formation of Deep Water
  - 5.6.2 Water Mass
  - 5.6.3 Implications for Climate

## 6. Ocean Waves and Tides

### 6.1 Introduction

### 6.2 Water Waves

#### 6.2.1 Wind-Wave Generation

#### 6.2.2 Deep-Water and Shallow-Water Waves

#### 6.2.3 Seiche

#### 6.2.4 Wave Mediated Atmosphere-Ocean Transfer

### 6.3 Internal Waves

### 6.4 Ocean Tides

#### 6.4.1 Tide-Generating Forces

#### 6.4.2 Types of Tides

#### 6.4.3 Tides in Ocean Basins

#### 6.4.4 Tidal Currents

#### 6.4.5 Observing and Predicting Tides

#### 6.4.6 Open-Ocean Tides

#### 6.4.7 Power Generation from Ocean Waves and Tides

### 6.5 The Tsunami Hazard

## 7. The Dynamic Coast

### 7.1 Introduction

### 7.2 Coastline Formation

### 7.3 Coastal Features

#### 7.3.1 Beaches

#### 7.3.2 Barrier Islands

#### 7.3.3 Rip Currents

7.3.4 Tidal Wetlands

7.3.5 Human Alterations

7.4 Estuaries

7.5 Coastal Storms

7.6 Tropical Cyclone Characteristics

7.6.1 Hurricane Hazards

7.6.2 Tropical Cyclone Development

7.7 Extratropical Cyclones

---

## 8. Marine Ecosystems

8.1 Introduction

8.2 Requirements for Marine Life

8.3 Structure of Marine Ecosystems

8.3.1 Marine Microbes

8.3.2 Producers

8.3.3 Consumers

8.3.4 Decomposers

8.3.5 Viruses

8.3.6 Trophic Structure of Ecosystems

8.3.7 Bioaccumulation and Biomagnification

8.4 Ecosystem Processes

8.4.1 Energy for Growth and Reproduction

8.4.2 Production in the Photic Zone

8.4.3 Nutrients and Trace Elements as Limiting Factors

8.5 Ocean's Role in the Global Carbon Cycle

8.5.1 Physical Pump

8.5.2 Biological Pump

8.6 Ecosystem Observations and Models

## 9. Life in the Ocean

### 9.1 Introduction

### 9.2 Marine Habitats

#### 9.2.1 Oceanic Life Zones

#### 9.2.2 Pelagic and Benthic Environments

### 9.3 Marine Animals

#### 9.3.1 Invertebrates

#### 9.3.2 Fishes

##### 9.3.2.1 Agnathans

##### 9.3.2.2 Cartilaginous Fishes

##### 9.3.2.3 Bony Fishes

#### 9.3.3 Marine Mammals

#### 9.3.4 Marine Reptiles

#### 9.3.5 Seabirds

### 9.4 Life Strategies and Adaptations

#### 9.4.1 Buoyancy

#### 9.4.2 Light and Vision

#### 9.4.3 Sound

#### 9.4.4 Feeding Strategies

#### 9.4.5 Reproduction

#### 9.4.6 Associations

### 9.5 Life in Selected Marine Environments

#### 9.5.1 Intertidal Zone

#### 9.5.2 Sea Grass Beds and Salt Marshes

#### 9.5.3 Kelp Forests

#### 9.5.4 Life On and In the Deep Ocean Floor

#### 9.5.5 Hydrothermal Vent Systems

## 10. The Ocean, Atmosphere, and Climate Variability

### 10.1 Introduction

### 10.2 Earth's Climate System

#### 10.2.1 Climate Controls

#### 10.2.2 Role of the Ocean

### 10.3 El Niño-Southern Oscillation

#### 10.3.1 Neutral Conditions in the Tropical Pacific

#### 10.3.2 El Niño, the Warm Phase

#### 10.3.3 La Niña, the Cold Phase

#### 10.3.4 Predicting and Monitoring El Niño and La Niña

##### 10.3.4.1 Frequency of El Niño and La Niña

### 10.4 Other Atmosphere-Ocean Oscillations

#### 10.4.1 North Atlantic Oscillation

#### 10.4.2 Arctic Oscillation

#### 10.4.3 Pacific Decadal Oscillation

#### 10.4.4 Madden-Julian Oscillation

## 11. Ocean Sediments

### 11.1 Introduction

### 11.2 Classification of Ocean Sediments

#### 11.2.1 Classification by Grain Size

#### 11.2.2 Classification by Particle Source

##### 11.2.2.1 Lithogenous Sediment

##### 11.2.2.2 Biogenous Sediment

##### 11.2.2.3 Hydrogenous Sediment

##### 11.2.2.4 Cosmogenous Sediment

- 11.3 Ocean Sediment Deposits
    - 11.3.1 Particle Transport and Settling
    - 11.3.2 Continental-Margin Deposits
    - 11.3.3 Deep-Ocean Deposits
  - 11.4 Distribution of Surface Sediments
  - 11.5 Ocean Sediment Stratigraphy
- 

## 12. The Ocean and Climate Change

- 12.1 Introduction
- 12.2 The Climate Record
- 12.3 Factors Contributing to Climate Change
  - 12.3.1 Solar Variability
    - 12.3.1.1 Sunspots
  - 12.3.2 Earth's Orbit
  - 12.3.3 Plate Tectonics
  - 12.3.4 Volcanoes
  - 12.3.5 Earth's Surface Properties
  - 12.3.6 Human Activity
- 12.4 Reconstructing Past Climate Conditions
  - 12.4.1 Proxy Records
  - 12.4.2 Instrument-based Temperature Record
- 12.5 The Climate Future
  - 12.5.1 Global Climate Models
  - 12.5.2 Search for Cycles and Analogs
    - 12.5.2.1 Methane Hydrates and Climate Change
  - 12.5.3 Enhanced Greenhouse Effect and Global Warming
  - 12.5.4 Climate Sensitivity
- 12.6 Consequences of Global Warming

- 12.6.1 Warming Ocean
  - 12.6.2 Shrinking Ice Sheets
  - 12.6.3 Shrinking Arctic Ocean Ice Cover
  - 12.6.4 Rising Sea Level
  - 12.6.5 Ocean Acidification
  - 12.6.6 Deoxygenation
  - 12.6.7 Marine Life
- 

## **13. Ocean Exploration: Past and Present**

- 13.1 Introduction
  - 13.2 Investigating the Ocean
    - 13.2.1 Voyages of Exploration
    - 13.2.2 Voyages for Science
  - 13.3 Modern Ocean Studies
    - 13.3.1 Technological Innovations
    - 13.3.2 Remote Sensing
    - 13.3.3 Scientific Ocean Drilling
    - 13.3.4 Ships of Opportunity
    - 13.3.5 International Cooperation
    - 13.3.6 Autonomous Underwater Vehicles
    - 13.3.7 Aerial Drones
    - 13.3.8 Tags
    - 13.3.9 Towed Instruments
    - 13.3.10 Buoys
    - 13.3.11 Ocean Observatories
    - 13.3.12 Computers and Numerical Models
- 

# 14. Ocean Stewardship

## 14.1 Introduction

## 14.2 Stewardship of the Ocean

## 14.3 Adverse Effects of Human Activities

### 14.3.1 Interference with Photosynthesis and Respiration

### 14.3.2 Habitat Alteration

### 14.3.3 Community Structure Alteration

### 14.3.4 Contamination of Seafood

### 14.3.5 Beach Closures and Aesthetic Losses

### 14.3.6 Toxic Substances

#### 14.3.6.1 Evaluating Toxicity

#### 14.3.6.2 Synthetic and Naturally Occurring Toxins

## 14.4 Reversing the Decline of Estuaries

## 14.5 Fisheries and Sustainable Exploitation

### 14.5.1 Overfishing

### 14.5.2 Maximum Sustainable Yield

### 14.5.3 Ecologically Sustainable Yield

### 14.5.4 Bycatch

### 14.5.5 Restoring Fisheries

### 14.5.6 Recreational Fisheries

## 14.6 Protecting Endangered Marine Species

### 14.6.1 Sea Turtles

### 14.6.2 Marine Mammals

#### 14.6.2.1 Whales

#### 14.6.2.2 Manatees

#### 14.6.2.3 Sea Lions

#### 14.6.2.4 Polar Bears

#### 14.6.2.5 Sea Otters

### 14.6.3 Seabirds

14.7 Aquaculture

14.8 Marine Exotic Species

## 15. Ocean and Climate Policy

15.1 Introduction

15.2 Milestones in Ocean Governance

15.2.1 Freedom of the Seas

15.2.2 Law of the Sea Treaty

15.2.2.1 Exclusive Economic Zones and Extended Continental Shelf Rights

15.2.3 Antarctic Treaty

15.2.4 Coastal Zone Management

15.3 Global Policy in Response to Climate Change

15.3.1 Mitigation

15.3.1.1 Fossil Fuel Alternatives

15.3.1.2 Geoengineering

15.4 Obstacles to Ocean Policy Making

## Glossary

## Appendix I. Conversion Factors

## Appendix II. Ocean Timeline
