

5-6 August 2024,
Washington, D.C.

2024 SUMMER COMMUNITY MEETING

Sponsorship Opportunities

"The AMS Summer Community Meeting is the premier event for focused discussions about the state and future of our own community - who we are, what we want to be, and how we contribute to society."

-Bill Gail Former AMS President

*Hosted by the American
Meteorological Society and
organized by:*

*Commission on the Weather,
Water, and Climate Enterprise
(CWWCE)*

Sponsorship Opportunities

The [AMS Summer Community Meeting](#) will welcome members of the Weather, Water, and Climate Enterprise to Washington D.C. for two days of discussion by Enterprise leadership. The 2024 theme “Ensuring a Robust Weather, Water, and Climate Enterprise,” will provide the community with an opportunity to learn about, discuss, debate, and build on the preliminary findings from an AMS study on the Weather Enterprise. There are several opportunities for organizations to partner with AMS and support the collaboration and networking of attendees this summer!

Sponsorship Now Closed

The Summer Community Meeting will feature leading voices in our community, including Michelle Mainelli, Deputy Director of the NWS.

Check out the [program](#) to learn more about the participants. Discover how you can introduce a speaker during the meeting!*

"The Summer Community Meeting is an excellent opportunity to engage with the weather enterprise community, expand business relationships, and strengthen collaborations. The SCM is a smaller meeting focused on topics that impact all sectors. Attendees have an opportunity to weigh-in on matters that will impact the evolution of the weather enterprise and how the various sectors will contribute. It's always been a very worthwhile meeting."

-Bill Mahoney, NCAR Associate Director Emeritus

Icebreaker Reception \$5000 - Go Green This Summer in Washington D.C.

This will be an AMS Green Meeting event! Help AMS set the standard for sustainable conferences and lead the charge in reducing the meeting's carbon footprint. These efforts include reducing travel emissions, prioritizing energy efficiency at venues, and reducing resource consumption and waste on site. Gain the goodwill and recognition of attendees for taking the lead in this important initiative!
