

Supplement to the Bulletin of the American Meteorological Society, Volume 89, Number 5

ANNUAL REPORT 2007

The American Meteorological Society

PRESIDENT'S REMARKS

I am pleased to introduce the 2007 AMS Annual Report, a summary of activities and achievements of our Society! After an inauspicious start to the year with a prolonged ice storm in San Antonio, which caused hundreds of members to miss the Annual Meeting, the AMS recovered nicely to have a successful year in its many activities in support of our new mission statement reflecting our science's service to society.

For the first time in the 89-year history of the AMS, I asked a panel of experts to take a broad look at our programs and organization in an external review. We should all be pleased that the panel found the AMS to be a "well led and managed membership organization—one that is responsive to and inclusive of its members." I thank Keith Seitter and the AMS staff for their excellent cooperation and preparation for this review.

Our programs in scientific publications, public policy, education and outreach, professional certification, and scientific and technical meetings continue to reflect a vibrant and productive Society; one of the most successful public, private and academic partnerships anywhere. All of these activities are made possible by hundreds of volunteers who contribute ideas and energy to our field; many of these extraordinary people are listed in this report, and I thank them all for their service.

I am especially pleased to note the dramatic increase in student participation in our meetings and in local chapters. The growth of student participation in our Annual Meeting, as shown by the more than 400 students who participated in the Sixth Student Conference in San Antonio, is remarkable. Through these meetings, the students bring renewed vitality to the AMS and begin forming supportive networks of friends and colleagues from around the world that will last throughout their careers.

Finally, in 2007 we explicitly recognized that people from many backgrounds and with complementary skills contribute to our profession, and set a goal of doubling the AMS membership in five years. The explicit recognition of the need for professional diversity and the simplification of the applications procedures resulted in a significant increase in membership. With the help from our membership in recruiting new members, we should be able to meet or exceed our goal by the 2012 meeting in New Orleans.

Thank you very much for giving me this opportunity to serve the AMS as its President; it is an experience I will never forget.

Sincerely,

A handwritten signature in black ink that reads "Rick Anthes". The signature is written in a cursive, slightly slanted style.

Rick Anthes, *AMS President*

AMS Mission Statement:

To advance the atmospheric and related sciences, technologies, applications, and services for the benefit of society.

2007 IN REVIEW

The AMS took two bold steps toward greater inclusiveness in 2007, broadening our sphere of activity as well as our membership base.

The first was the official change of the Society's mission statement to explicitly state that the AMS furthers science to benefit society. Though societal needs have always been a driving force behind AMS activities, this year the membership resoundingly voted to officially acknowledge its broad, civic motivation.

The second step was a real commitment to broaden the AMS community by clarifying our membership criteria and simplifying the application process. The Society has always acknowledged that individuals seeking to become full, voting Members have to meet certain professional and/or educational requirements and that such criteria are open to broad and inclusive interpretation. A new *Interpretive Memorandum for Election to the Grade of Full Member of the AMS* established a clearer understanding of our intent to welcome professionals from throughout the weather and climate enterprise, expanding the Society's reach into related sciences and services.

These changes stemmed in part from an unprecedented External Review—itsself one of the major accomplishments in a year full of notable developments. External reviews are common in private industry, but somewhat atypical in the nonprofit community. AMS President Rick Anthes, who had recently completed a similar review at the National Center for Atmospheric Research, initiated this exercise to identify ways that AMS might better achieve its strategic goals and advance its mission. The review panel, which was composed of experienced managers and science association executives, confirmed the overall health of the Society and provided recommendations to strengthen it. Their report is available online at <http://www.ametsoc.org/aboutams/externalreview.pdf>

As the panel noted about the new, streamlined membership process and enhanced inclusiveness, "With these changes, and given the ever increasing importance of atmospheric and related sciences and applications, the Panel sees a great opportunity for significant growth in the AMS membership and thinks that 2007 AMS President Richard Anthes' challenge at the AMS Annual meeting in January 2007 to double the membership in five years is entirely realizable."

External Review Committee (front) and the AMS Boston Staff.

Nobel Peace Prize

For the first time ever, scientists from the atmospheric and related fields were awarded the Nobel Peace Prize. The prize presented in December 2007 honored a collaboration of thousands of scientists and officials from more than 100 countries. The Society congratulates former Vice President Albert A. Gore for his tireless efforts to create worldwide understanding about one of our world's greatest environmental challenges and for being a champion of the environmental sciences. The AMS also applauds the Intergovernmental Panel for Climate Change for their countless hours of research to ensure the scientific integrity and create worldwide understanding about this critical issue.

AMS Books Earn Recognition

It was a year of awards for AMS books. In January 2007, *Railroads and Weather*, by Stanley A. Changnon, won an Atmospheric Science Librarians International (ASLI) Choice Award honorable mention. *The Callendar Effect*, by James Rodger Fleming, also was named the ASLI Choice Award Winner in the category History of Meteorology. Last summer, *The Callendar Effect* was awarded a SNAP (Society of National Association Publishers) Gold Award for “the best writing, content, graphic design, photographs, and overall packaging” of a book.

PUBLICATIONS

Publishing Journals, Books, and Monographs with Quality Reputations

It was a banner year for AMS publications. In 2007, AMS journals set two new major all-time records publishing 24,926 pages collectively in the scientific and technical journals (a 13% increase over 2006) and sending 1,609 manuscripts to press (shattering the old record of 1,489 set in 2005). In addition, the AMS Books program began to flourish with numerous books winning awards and honors.

2007 HIGHLIGHTS

- Overall journal submissions continued at a robust pace, topping 2,000 once again in 2007.
- Pure production time was around 130 days on average; however, by the time production began on many papers, they had already been in house and awaiting action for up to three months. *Our top priority is to eliminate the backlog as a major factor in production time, and thus take the fullest possible advantage of the efficiencies made possible with an all-electronic work flow.*
- Early Online Releases debuted in early 2008, allowing papers to be posted almost immediately upon acceptance, thus making research results available to journal subscribers months earlier than had been possible in the past.
- With over 600,000 pages of AMS electronic journal content now available, the Personal Online Library (POL) became an essential organizational and customization tool in 2007.
- In 2007, *Lewis and Clark: Weather and Climate Data from the Expedition Journals*, edited by Vernon Preston, was released.
- AMS Books (including monographs) were featured at six scientific conferences and three AMS specialty meetings this year, were reviewed in six international publications, and *The Callendar Effect* was the subject of a radio broadcast.

ATMOSPHERIC POLICY PROGRAM

Strengthening Connections between Public Policy and Earth System Science and Services

For the AMS Policy Program, 2007 marked a year of growth and expansion with deepening roots in climate policy, advancing the role of weather and climate sciences to protect human health and health care delivery, and focusing on the societal valuation of meteorological products and services.

2007 HIGHLIGHTS

- Nearly 30 graduate students and mid-level managers from across the country participated in the 10-day 2007 Summer Policy Colloquium. This year, support from the UCAR Significant Opportunities in Atmospheric Research and Science (SOARS) helped to fund two graduate students. All participants learned the policy process, and gained first-hand awareness of how scientific findings are channeled into policies. The Colloquium is an interactive education activity, featuring direct discussions with Congressional staffers, federal officials, and other high-level policy makers.
- SAIC and Northrop Grumman Corporation joined ITT, Lockheed Martin Corporation, and Raytheon Company as an underwriter of the AMS Policy Program.
- The AMS Climate Policy blog (www.climatepolicy.org) was officially launched. The blog provides an online forum for discussions about policy.
- The AMS hosted a unique cross-sector meeting, “*Under the Weather: Environmental Extremes and Healthcare Delivery*,” in partnership with the world’s largest public health organization, the American Public Health Association. The meeting fostered dialog for connecting the two service-oriented sciences and identified ways to increase the utility of weather and climate services for the protection of human health and healthcare delivery.
- The first Climate Policy Workshop and Summit on Federal Climate Policy was held in 2007. Workshop attendees discussed the merits of “greenhouse gas emission fees” (often called carbon taxes) as a potential tool to encourage meaningful mitigation.
- The AMS also brought scientists and economists together in a two-day meeting called “*In Our Best Interest: Unlocking the Potential Value of Environmental Information and Services*” last year. Attendees from environmental agencies and organizations initiated a discussion of “valuation” as it applies to environmental data and services.
- Dr. Michael Morgan, full professor from the University of Wisconsin-Green Bay, was selected as the 2007–2008 AMS/UCAR Congressional Science Fellow. Dr. Morgan is working on a broad range of issues in Senator Benjamin Cardin’s (D-Maryland) office including climate change, energy, NASA, and homeland security.

AMS Environmental Science Seminar Series (ESSS)

The Society is becoming a familiar face on Capitol Hill thanks to the Environmental Science Seminar Series. Last year, the AMS hosted 11 seminars for members of Congress and their staff. The topics ranged from climate and energy challenges and policy, to the Arctic sea ice melting, to water vapor, precipitation, and space weather. Other seminars highlighted effective communication, climate change science, and fisheries and the marine ecosystem.

All seminars are being recorded for audio and video podcasts on the AMS Web site (<http://www.ametsoc.org/atmospolicy/EnvironmentalScienceSeminarSeries.html>) and some are being featured on YouTube. The ESSS encourages policy-maker understanding of the latest science as highlighted by well-respected researchers and scientists.

Ocean Studies

The AMS put the finishing touches on a new oceanography text in 2007. The *Ocean Studies: Introduction to Oceanography, 2nd Edition*, edited by AMS Online Weather Studies Coordinator Joseph Moran, should be ready for students and teachers through college book stores in summer 2008. The text will be used with the *Ocean Studies* (formerly known as *Online Ocean Studies*) introductory college course, which AMS licenses nationwide. The Society will also bundle the text with a lab manual and inflatable globe, which will be sold to students enrolled in the licensed course. The same text will be used with the precollege *DataStreme Ocean* program.

EDUCATION

Promoting the Teaching of Atmospheric, Oceanographic, and Hydrologic Sciences

As of December 2007, the AMS *DataStreme* courses have trained 12,872 teachers. The innovative distance-learning courses, workshops, and educational materials have reached hundreds of thousands of other teachers and millions of students. The program is now poised to focus on general climate and climate change literacy.

2007 HIGHLIGHTS

- A survey of *DataStreme* distance-learning course alumni, conducted in Spring 2007, indicated that the teachers are extremely positive about the program. Asked if it made them a better teacher of science, 99% strongly agreed/agreed. According to the external evaluator, the most telling assessment was that 94% of the course alumni said they would take another *DataStreme* course if it were offered in their area.
- The suite of *DataStreme* teacher-enhancement courses trained a total of 1,144 precollege educators via 77 Local Implementation Teams nationwide during the 2006–07 school year.
- The NSF-funded *Online Weather Studies* Geosciences Diversity/National Dissemination Project has conducted six workshops over the past six years for undergraduate faculty members from 145 Minority-Serving Institutions (MSIs). Many MSIs are now offering an introductory meteorology course for the first time because of this project.
- The NSF-funded *Online Ocean Studies* National Dissemination Project held its second workshop for 24 undergraduate faculty members from MSIs in June 2007 at the University of Washington School of Oceanography and nearby NOAA facilities. It was the second of three such workshops designed to introduce the AMS oceanography course to 75 MSI campuses over a three-year period.
- The NOAA Education Office has funded the first year of a five-year grant to support *DataStreme Atmosphere* and *DataStreme Ocean* courses. NASA is providing support for *DataStreme WES* through the 2007–08 school year.
- AMS *Weather Studies* and *Ocean Studies* course packages continue to be marketed to undergraduate institutions. Over 360 institutional licenses have been issued to date for the meteorology course and 90 for the oceanography course.

AMS CERTIFICATION PROGRAMS

Recognizing Competence and Fostering Professionalism

The AMS Certification Programs gained renewed interest in 2007 with the celebration of the 50th Anniversary of the Certified Consulting Meteorologist (CCM) program and an increase in Spanish-speaking applicants for the Certified Broadcast Meteorology (CBM) and Seal of Approval programs.

2007 HIGHLIGHTS

- The AMS Board of Broadcast Meteorology created a Spanish-speaking panel to evaluate the growing number of Spanish CBM and Seal of Approval applicants. The goal of the panel is to help ensure that a fair assessment can be made of a Spanish applicant's communication skill, informational and explanatory value, and technical competence.
- 67 broadcast meteorologists earned the CBM certificate.
- 47 broadcast meteorologist earned the AMS Television Seal of Approval.
- Seven AMS members earned the CCMs certificate.
- As a result of the efforts of the CCM Marketing Committee and the CCM community, applications for the CCM certificate doubled from 2006 to 2007.

The following AMS Chapters were formed in 2007

Marymount School of New York Pre-College Chapter, New York, NY

Northwest Indiana Student Chapter, Valparaiso, IN

University of Incarnate Word Student Chapter, San Antonio, TX

University of North Carolina – Charlotte Student Chapter, Charlotte, NC

Western Kentucky University Student Chapter, Bowling Green, KY

Golden Anniversary

The AMS CCM program dates back to 1956 when, in response to the growth of weather-related businesses following World War II, the now defunct AMS Committee on Industrial Meteorology recommended that the Society create and administer a professional certification program. The Council approved the recommendation and established a Board of Certified Consulting Meteorologists, whose initial six members were the first to receive the CCM designation. The board published its first announcement for applications to the program in the November 1957 *Bulletin of the American Meteorological Society* and subsequently awarded its first CCM designation under the new program to Loren Crow, a pioneer in private-sector industrial meteorology. As of the end of 2007, 631 individuals have received the CCM designation. To celebrate the 50th anniversary of the CCM program, the AMS held a special forum and reception at the Annual Meeting in San Antonio.

Fellowship and Scholarships by the Numbers

The Society has awarded 475 scholarships, 249 graduate fellowships, and 8 graduate history fellowships totaling more than \$6.2 million to students pursuing degrees in the atmospheric and related sciences since its inception.

In 2007 alone, the AMS awarded 16 fellowships in the amount of \$352,000; 21 named undergraduate scholarships in the amount of \$55,000; 14 freshman undergraduate scholarships awarded totaling \$70,000; and 6 minority scholarships awarded for a total of \$36,000.

Each year students from more than 50 colleges and universities apply for the senior scholarships and graduate fellowships.

DEVELOPMENT

Aiming High to Expand Opportunities

The AMS 21st Century Campaign received over \$300,000 in contributions from individuals in 2007, including donations to Campaign programs and named funds. The Campaign remains a vital component of the Society's activities. Member contributions allow AMS to implement activities and programs that rely on external support of this kind, many of which are student related. In addition, the Society's scholarship and fellowship programs continue to receive generous support from corporations and government agencies, and corporate support for several other AMS programs has increased.

2007 HIGHLIGHTS

- In 2007, Lockheed Martin Corporation, ITT, and Raytheon Company all renewed their support to AMS at the \$100,000 corporate patron level. In addition, SAIC and Northrop Grumman Corporation have made a commitment to become Corporate Patrons.
- The AMS graduate fellowship program, with the support of AMS members, corporations, and government agencies, has provided financial assistance to nearly 250 first-year graduate students over the past 15 years, affording these students the opportunity to focus solely on their studies and research. In addition to the monetary support, fellowship students attend the annual meeting and are invited each summer to participate in a week-long tour of various federal government agencies and meet with Capitol Hill staffers.
- The Society supported three minority undergraduate science scholarships last year. This program has seen a significant increase in applicants since its inception in 1993. Two of the recipients have gone on to receive an AMS named undergraduate scholarship and an AMS graduate fellowship.
- The 6th Student Conference was a huge success, continuing the growth of this very important initiative that is funded completely through AMS member donations to the 21st Century Campaign.
- With member contributions, AMS was able to provide partial travel support for more than 100 students to attend the AMS Annual Meeting in San Antonio.
- More than 40 corporations contributed over half a million dollars to meeting sponsorships, fellowships and scholarships, and the Summer Policy Colloquium in 2007.

MEMBERSHIP

Delivering Value to our Members

Delivering value to our members, clarifying the criteria for AMS membership, and simplifying the application procedure set a new standard for membership services in the Society in 2007. The new membership application process makes it even more clear that the Society welcomes not only those with backgrounds in the atmospheric sciences, oceanography, and hydrology but also those working in fields such as engineering, economics, law, journalism, communication, political science, education, history, human resources, finance, and psychology, when their activities are impacting the AMS community. These changes in the membership application process, and increased marketing efforts, significantly increased new member applications in 2007. As of year end, the Society had 13,360 members.

2007 HIGHLIGHTS

- The growth trends from previous years continued in 2007. Overall, the total number of members increased more than 20% in the last six years — from 10,996 in 2001 to 13,360 at the end of 2007.
- Two new member services contributed to the increased membership including the Personalized Online Library (POL) for the AMS Journals Online and the new *Weatherwise* magazine offer. AMS members can purchase a personal subscription and an unlimited number of gift subscriptions to *Weatherwise* magazine at a 40% discount (the prior discount was 20%).
- The Society finished 2007 with just over 9,100 full Members (which includes Honorary Members, Fellows, and Members).
- The number of Student Members, typically at the 1,000 mark before the introduction of the Early Career Dues rate, rose for the sixth year in a row. Student applications increased by 12% with 1,016 new students joining the Society this past year.
- Of the more than 1,800 new applications received in 2007, nearly three quarters were submitted online.

Membership

(as of 31 December 2007)

Honorary Members	36
Fellows	574
Members	8,529
Members with Student Privileges	153
Associate Members, Voting	41
Associate Members, Nonvoting	886
Associate Members, High School Students	133
Associate Members, K-12 Teacher	129
Student Members	2,701
Corporation Members	178 <i>(Includes 8 Sustaining; 73 Regular; 13 Small Business; 84 Publications)</i>

TOTAL	13,360
--------------	---------------

The AMS Student Conference

More than 400 students attended the 6th Annual Student Conference in San Antonio. With high-level speakers, breakout sessions, and luncheons, this conference provided a unique learning experience. Donations from members to the AMS 21st Century Campaign supported this conference in its entirety.

MEETINGS

Enhancing the Exchange of Scientific and Technological Knowledge

2007 MEETINGS AT A GLANCE

- The Society hosted 12 meetings in 10 different cities.
- 4,435 people attended the various AMS conferences and symposia.
- A total of 2,164 scientific presentations and papers were given.
- More than 100 organizations took part in the 87th Annual Meeting in San Antonio.
- The AMS published four CD-ROMs of meeting abstracts.
- 14 organizations helped co-sponsor AMS meeting activities.

OUTREACH

Creating a More Scientifically Literate Population

Outreach is a common denominator of many of the Society's activities. Press releases about journal articles, press conferences, and newspaper stories triggered by the AMS, WeatherFest, and the AMS participation in the ResearchChannel® are the most important and visible outreach activities.

2007 HIGHLIGHTS

- WeatherFest has become one of the Society's premier outreach activities. The 6th Annual WeatherFest in San Antonio drew nearly 3,000 attendees from the local community. This event is dedicated to instilling a love for math and science among kids of all ages.
- A major book for a popular audience on weather and climate neared completion in 2007 with plans for a 2008 release. The book, authored by Jack Williams, AMS Coordinator of Public Outreach, features 125 graphics and 24 profiles of men and women in the atmospheric and related sciences.
- Representatives of AMS were among approximately 100 scientists, educators, and others who took part in a workshop at the University Corporation for Atmospheric Research in Boulder, Colorado, to begin drafting a national framework for atmospheric science and climate literacy.
- Working with media around the world continued as a major effort in 2007. A changing media landscape includes fewer dedicated science reporters. But with more online news providers the opportunities for coverage of the sciences are increasing.

NEW STATEMENTS

The Society adopted three statements in 2007 and endorsed two statements written by other scientific organizations:

- Endorsement of the WMO IWTC-VI "Statement on Tropical Cyclones and Climate Change" (Adopted by AMS Council on January 14, 2007)
- Climate Change (Adopted by AMS Council on February 1, 2007)
- Hurricane Forecasting in the United States (Adopted by AMS Council on March 14, 2007)
- Endorsement of the Recommendations in the National Research Council's "Earth Science and Applications from Space: National Imperatives for the Next Decade and Beyond" (Adopted by AMS Council on May 21, 2007)
- Weather and Forecasting (Adopted by AMS Council on August 8, 2007)

All AMS statements in force or under consideration are online at www.ametsoc.org/policy

The AMS Journal on the ResearchChannel

In 2007, under the creative direction of AMS Past President Walter Lyons, the AMS produced four AMS Journal programs for the ResearchChannel, each with an estimated 250,000 viewers during their life cycle. Including:

- "Benjamin Franklin's Science," during which Professor Philip Krider explored the many amazing contributions of Benjamin Franklin. The program was underwritten Vaisala, Inc.
- "The Hurricane Climate Connection" and "Is Global Climate Change Affecting Hurricanes?" a two-program series by Massachusetts Institute of Technology Professor Kerry Emanuel reviewing linkages between global warming and perceived increases in tropical cyclones. The programs were partially underwritten by the ResearchChannel.
- "The Certified Consulting Meteorologist 50th Anniversary," a program showcasing the nation's dependence on weather and climate information and the demand for specialized meteorological services. The National Council of Industrial Meteorologists helped support this program.

The ResearchChannel is a satellite and cable network reaching 30 million U.S. households and millions in 210 nations via the Internet. Free program access is available from the AMS home page, via iTunes U (Podcasts) and YouTube.

Underwriting opportunities available for 2008.

FINANCES

Managing Resources for Optimum Growth

The core programs of the AMS, including *BAMS*, the journals, books, and meetings, continue to reflect a strong bottom line. Unfortunately, other Society programs did not do so well in 2007, resulting in an overall loss for the year of approximately \$200,000.

2007 HIGHLIGHTS

- The Society's core programs reflected positive results for the third year in a row. Investment income, while close to budgeted amounts, was significantly lower than in 2006. This produced a shortfall in funds available to support other Society initiatives that have limited or no revenue sources.
- Development activities were productive with several new endowed named scholarships and a continued active fellowship and scholarship program. The financial contributions of our members are an important asset to the Society.
- The AMS Education Program continued to produce nationally and internationally recognized programs that are largely self-supported and operated on an annual budget of approximately \$2.0 million.
- The AMS Policy Program continued to do great work in the policy arena but funding for this initiative remains significantly short of expenditures.
- Complete financial details will be published in the August 2008 *BAMS*.

2007 COUNCIL OF THE AMS

Officers

- President: Richard A. Anthes, University Corporation for Atmospheric Research
- President-Elect: Walter F. Dabberdt, Vaisala Inc.
- Executive Director: Keith L. Seitter, CCM, American Meteorological Society
- Secretary-Treasurer: Kenneth C. Spengler, CCM, American Meteorological Society

Past President

- Franco Einaudi, NASA, Goddard Space Flight Center
- Walter A. Lyons, CCM, FMA Research Inc.

Councilors

Terms Expire 2008

- Joseph S. D'Aleo, CCM, JHS Associates
- Kelvin Droegemeier, University of Oklahoma
- Jenni Evans, The Pennsylvania State University
- Marcia K. Politovich, National Center for Atmospheric Research
- Robert A. Weller, Woods Hole Oceanographic Institute

Terms Expire 2009

- Mary G. Altalo, Ocean.US
- Raymond J. Ban, The Weather Channel
- Steven A. Rutledge, Colorado State University
- Joseph T. Schaefer, CCM, NOAA/Storm Prediction Center
- J. Marshall Shepherd, University of Georgia

•2007 Executive Committee

Terms Expire 2010

- Richard E. Carbone, National Center for Atmospheric Research
- Kenneth C. Crawford, Oklahoma Climatological Survey
- Amanda H. Lynch, Monash University
- X. William Proenza, NOAA/National Weather Service
- Dian J. Seidel, NOAA/Air Resource Laboratory

Michael S. Sublette, CBM

Science Reporting by a Broadcast Meteorologist Award Committee

Chair: Paul H. Gross, CCM, CBM
Sara Espinoza
Veronica Johnson
John McLaughlin, CBM
Ron McPherson
Gene Norman, CBM
Kathy Orr, CBM
Deb Sliter
John Toohey-Morales, CCM, CBM
Jay Trobec, CBM
Kris Wilson

Board of Certified Consulting Meteorologists

Chair: Jill F. Hasling, CCM
Elliot Abrams, CCM
Robert A. Baxter, CCM
James Giraytys, CCM
George D. Greenly, CCM
Gerald J. Mulvey, CCM
Peter J. Robinson, CCM
Vincent R. Scheetz, CCM

Board for Operational Government Meteorologists

Chair: R. Bruce Telfeyan
Keith C. Crosbie
Delain A. Edman
Gail I. Hartfield-Supina
Thomas R. MacPhail
Bennett S. Nelson
Lisa R. Schmit
Gail Tirrell Vaucher

Student Member:
Michael R. Lowry

Board for Private Sector Meteorologists

Chair: Kenneth F. Carey
James H. Block, CCM
Cranston R. Coleman
Jan F. Dutton
Stephen W. Harned, CCM
Kathleen E. Strebe
Bruce G. Thomas

Student Member:
Erik U. Noble

Board on Continuing Professional Development

Chair: Christopher E. Samsury
Steven A. Ackerman
Todd S. Glickman, CBM
Daphne S. LaDue
Kathy A. Lucas
Percy W. Thomas
Ex Officio: Donna J. Charlevoix

PUBLICATIONS COMMISSION

Commissioner: David P. Jorgensen
Members: Editors-in-Chief of periodicals and serials

Members-at-Large:
Joseph B. Klemp
Peter J. Lamb
William C. Skamarock

Board of the Journal of the Atmospheric Sciences

Chief Editor: Ka-Kit Tung

JAS Editors:
Dennis Hartmann
Patrick Minnis
Walter A. Robinson

Applied Climatology

Chair: Christopher Daly
David C. Bader
Andrea Bair
Mathew A. Barlow
Laura M. Edwards
Oliver W. Frauenfeld
Christopher C. Funk
Henry W. Reges
David A. Robinson

Artificial Intelligence Applications to Environmental Science

Chair: Sue E. Haupt
Ex Officio Chair:
Vladimir M. Krasnopolsky
Ex Officio Chair: Caren Marzban
Dennis J. Boccippio
William Hsieh
Valliappa Lakshmanan
S Lakshmiarahan
Antonello Pasini
Michael B. Richman
Philippe Tissot
John K. Williams

Atmospheric Biogeosciences

Chairs: Paul Comtois
Elisabeth Ann Holland
Jill S. Coleman
Gordon M. Heisler
Anandakumar Karipot
Kathleen V. Schreiber
John K. Westbrook

Atmospheric Chemistry

Chair: Brian K. Lamb
J. R. Arnold
Rao Kotamarthi
Steven E. Peckham
Renyi Zhang
Yang Zhang
Student Member:
Robert A. Elleman

Atmospheric Electricity

Chair: Lawrence D. Carey
Richard Blakeslee
Christopher B. Darden
Michael L. Gauthier
Stephen Hodanish
Timothy J. Lang
Carlos Morales
Martin J. Murphy
Xuan-Min Shao

Student Member:
Kristin M. Kuhlman

Atmospheric and Oceanic Fluid Dynamics

Chair: Adam H. Sobel
M. Joan Alexander
Oliver Buhler
Edmund K-Man Kar Chang
Gregory J. Hakim
George N. Kiladis
Claudia Pasquero
Bruce R. Sutherland

Atmospheric Radiation

Chair: Norman G. Loeb
Eugene E. Clothiaux
Lazaros Oreopoulos
Dana Veron
Robert Wood
Paquita Zuidema

Aviation, Range, and Aerospace Meteorology

Chair: Timothy L. Wilfong
Ryan K. Decker
Joanne Lancaster
Cecilia A. Miner
Frederick R. Mosher
Timothy D. Oram
Rodney J. Potts
William P. Roeder
Karen J. Shelton-Mur
Lynn A. Sherretz
James G. Stobie

William W. Vaughan, CCM
Jeffrey A. Weinrich
Marilyn M. Wolfson

Biometeorology and Outstanding Achievement Award Committee

Chairs: Paul Comtois
Elisabeth Ann Holland
Jill S. Coleman
Gordon M. Heisler
Anandakumar Karipot
Kathleen V. Schreiber
David L. Spittlehouse
Roger M. Wakimoto
John K. Westbrook

Boundary Layers and Turbulence

Chair: Branko Kosovic
Robert M. Banta
Evgeni Fedorovich
Thomas W. Horst
Harm J. Jonker
Cheryl L. Klipp
David A. R. Kristovich
Fernando Porte-Agel
Gunilla Svensson
Jordi Vila-Guerau de Arellano

Charles Mitchell Award Committee

Chair: Mary M. Cairns
Jennifer C. Alexander
Renee R. Fair
Michelle R. Farver
Jay W. Hanna
Peter Paul Neilley
Roger V. Pierce
Zhaoxia Pu
Bruce L. Rose
David M. Schultz
Michael L. Sestak
Neil A. Stuart
Douglas A. Wesley
Student Member:
Ashton D. Robinson Cook

Climate Variability and Change

Chair: Gerald L. Potter
Heidi M. Cullen
Aiguo Dai
David R. Easterling
Thomas R. Knutson
Philip W. Mote
John O. Roads
Catherine Senior
Eileen L. Shea

Student Member:
Juliane L. Fry

Cloud Physics

Chair: Gregory M. McFarquhar
Patrick Chuang
Ann M. Fridlind
Sabine L. Goetze
Jerry Y. Harrington
Christopher A. Jeffery
Eric Jensen
David B. Mechem
Hugh Morrison
Ping Yang

Coastal Environment

Chair: Julie D. Pullen
Michael Bruno
Alan M. Cope
Kathleen A. Edwards
Darko R. Koracin
Rick Luettich
Robert E. Marshall
P. Ola G. Persson
James K. Titlow
Michael K. H. Tjernstrom
Robert H. Weisberg

Exceptional Specific Prediction Award Committee

Chair: Mary M. Cairns
Jennifer C. Alexander
Renee R. Fair
Michelle R. Fraver
Jay W. Hanna
Peter Paul Neilley

Roger V. Pierce
Zhaoxia Pu
Bruce L. Rose
David M. Schultz
Michael L. Sestak
Neil A. Stuart
Douglas A. Wesley
Student Member:
Ashton D. Robinson Cook

Helmut E. Langsberg Award Committee

Chair: Petra M. Klein
Ex Officio Chair: Satya Pal Arya
Martin John Best
Anthony J. Brazel
Gregory R. Carmichael
Timothy Scott Dye, CCM
Rayford P. Hosker
David J. Sailor
Steve Zubrick

Hydrology

Chair: Bart Nijssen
Michael G. Bosilovich
Wade T. Crow
Paul A. Dirmeyer
Chandrasekhara R. Kondragunta
Robert J. Kuligowski
Deborah K. Nykanen
C. Adam Schlosser
Student Member:
Susan C. Dunne

Laser Atmospheric Studies

Chair: Belay B. Demoz
Andreas Behrendt
Jennifer M. Comstock
Christine David
David Donovan
Cyrille N. Flamant
David W. Roberts
Student Member:
Gijs de Boer

Measurements

Chair: Clifford B. Baker
Frank W. Gallagher
Alisa E. A. Holley
Tapani Laine
Miroslav Ondras
Student Member:
Alisa E. A. Holley

Mesoscale Processes

Chair: David J. Stensrud
Scott A. Braun
George H. Bryan
Shu-hua Chen
Robert G. Fovell
Vanda Grubisic
David E. Kingsmill
David W. Reynolds
Chris Snyder
Sandra E. Yuter
Student Member:
Melissa S. Bukovsky

Meteorological Aspects of Air Pollution

Chair: Satya Pal Arya
James E. Bossert
Michael John Brown
Paula Davidson
Petra M. Klein
John N. McHenry
Kenneth L. Schere
Allen B. White

Meteorology and Oceanography of the Southern Hemisphere

Chair: Howard J. Diamond
Ex Officio Chair: Carolina Vera
Warren Gray
Alice M. Grimm
Peter J. Lamb
Carlos A. Nobre
Chris J. C. Reason
Steve Rintoul
Anji Seth

Middle Atmosphere

Chair: Linnea M. Avallone
S. D. Eckermann
Andrew Gettelman
Laura L. Pan
Judith Perlwitz
L. M. Polvani
Ellis E. Remsberg
Fabrizio Sassi
David W. J. Thompson

Mountain Meteorology

Chair: C. David Whiteman, CCM
Fotini Katopodes Chow
Lisa S. Darby
Stephan F. J. De Wekker
Michael P. Meyers
Stephen David Mobbs
Brad Snyder

Planned and Inadvertent Weather Modification

Chair: Joseph H. Golden
Bruce A. Boe
Daniel W. Breed
Andrew Detwiler
Arlen W. Huggins
Steven M. Hunter
Terrence W. Krauss
Byron L. Marler
Daniel Rosenfeld
Gary Walker
William L. Woodley, CCM

Polar Meteorology and Oceanography

Chair: Taneil Uttal
Vice Chair: Stephen Jackson Vavrus
John J. Cassano
Dimitris Menemenlis
Ian A. Renfrew
Axel J. Schweiger
Matthew Shupe
Eric D. Skyllingstad

Probability and Statistics

Chair: Richard W. Katz
William M. Briggs
David R. Bright
Joseph P. Dallavalle
Elizabeth E. Ebert
Tilmann Gneiting
Thomas M. Hamill
Cecile Penland
David B. Stephenson
Marina Timofeyeva
Student Member:
Elise V. Johnson
Ex Officio: Harry R. Glahn

Radar Meteorology

Chair: Peter Thomas May
Ex Officio Chair: Rita D. Roberts
Howard B. Bluestein
Rodger A. Brown
Gerald Heymsfield
Jarmo J. Koistinen
Pavlos Kollias
Andrew L. Pazmany
Robert M. Rauber, CCM
Tammy M. Weckwerth
Christopher C. Weiss

Reichelderfer Award Committee

Chair: Roger M. Wakimoto
Jennifer C. Alexander
Michael G. Bosilovich
Keith C. Crosbie
Roger V. Pierce
R. Bruce Telfeyan
Michael K.H. Tjernstrom

Satellite Meteorology and Oceanography

Chair: Philip Ardanuy
Ex Officio Chair: Christopher S. Velden
Robert M. Atlas
Gerald J. Dittberner, CCM
Wayne F. Feltz
Dennis A. Hobson
Douglas A. May
Lars P. Riishojgaard

Franklin Peter Robertson
Timothy J. Schmit
R. Stuhlmann
Francis J. Turk
Student Member:
Anita D. Rapp

Severe Local Storms

Chair: Yvette P. Richardson
Michael C. Coniglio
John A. Hart
Paul R. Janish
Timothy P. Marshall
Matthew D. Parker
Ronald W. Przybylinski
Philip N. Schumacher
Stanley B. Trier
Student Member:
James E. Hocker

Tropical Meteorology and Tropical Cyclones

Chair: Lixion A. Avila
Patrick A. Harr
Robert Hart
Michelle M. Mainelli
Lynn K. Shay
Yuqing Wang
Matthew C. Wheeler

Weather Analysis and Forecasting

Chair: Mary M. Cairns
Jennifer C. Alexander
Renee R. Fair
Michelle R. Farver
Jay W. Hanna
Peter Paul Neilley
