Together for Discovery

AMS MEETINGS

From the Annual Meeting–the world's largest yearly gathering for the weather, water, and climate community, to our multiple specialty conferences, short courses, and events, there are multiple opportunities which provide recognition, engagement and business lead generation. Each year brings together thousands of scientists, professionals, students, educators, and researchers from around the world. We will work with sponsors to tailor packages to best meet their goals for support. Attendees are waiting for your company at an AMS Meeting!

2026 AMS Meetings open to sponsorship!

Science Moves Forward—With You!

AMS POLICY PROGRAM

The AMS Policy Program works to ensure that trusted weather, water, and climate science informs decisions that our community. Supporters can play a vital role in strengthening the scientific community's ability to engage in the policy process and communicate emerging insights to decision-makers. Program sponsors help accelerate the public's understanding and use of science via impactful workshops, studies, and policy analysis. Partner with AMS to elevate science in public discourse and showcase your commitment to informed, science-based decision-making.

FELLOWSHIP AND SCHOLARSHIP PROGRAM

Each year, the AMS awards fellowships and scholarships to students pursuing degrees in the atmospheric and related sciences. Since 1991, nearly 1,400 awards have been granted, totaling more than $12 million in support. Fellowships and scholarships not only empower individual recipients but also provide strength to the broader scientific community by expanding access to higher education. You can make a lasting difference. Tomorrow's leaders start with today's support.

Invest in a Meaningful Partnership

AMS CORPORATE MEMBERSHIP

Corporate Membership (CIM) is a meaningful way to support and engage with the AMS mission. Members gain valuable benefits, including discounts on exhibiting, individual memberships, journal access, and more! These companies demonstrate a strong commitment to the weather, water, and climate community. The program has flexible membership levels designed for organizations of all sizes, every company has the opportunity to stand out, make an impact, and be recognized

EARLY CAREER LEADERSHIP ACADEMY

The Early Career Leadership Academy (ECLA) aims to cultivate a diverse network of emerging leaders in weather, water, and climate sciences. By focusing on creative problem-solving, conflict resolution, trust-building, and communication skills, ECLA provides valuable training for these future leaders. Demonstrate a commitment to inclusivity by supporting individuals from diverse backgrounds and experiences. There are options for sponsors to can participate in ECLA workshops.

Where Support Meets Potential, Science Flourishes

STEM K-13 EDUCATION PROGRAM

The AMS Education Program is dedicated to advancing the teaching of atmospheric and related sciences by empowering pre-college educators through training and high-quality instructional materials. AMS aims to equip teachers with the tools needed to inspire curiosity and scientific understanding in students nationwide. Corporate support expands access to science education and one great teacher can provide a lifetime of inspiration to students.

AMS STUDENT TRAVEL SUPPORT

Student Travel Grants are essential in helping students attend the scientific meetings of AMS, where they gain access to leading voices across academia, government, and the private sector. These experiences provide unparalleled opportunities to build professional insight and networks that can shape the trajectory of their careers. Private sector funding plays a vital role in making this possible and helps students connect their education to real-world applications, explore potential career paths, and form relationships that lay a strong foundation for future success. Impact an individual and they can change an entire community.

Shape the Discussion

AMS CORPORATE PATRONS

Forward-looking corporations recognize both the opportunity and the responsibility to serve society and assume leadership roles. To achieve these goals, such corporations must seek and cultivate partnerships with other private enterprises, all levels of government, and the academic community. AMS provides a vital and unique national platform and framework for fostering these partnerships. AMS unites parties with the shared objective of supporting and strengthening the weather, water, and climate community, facilitating their effective collaboration.

Becoming a Corporate Patron offers significant benefits, including enhancing the business climate through investments in national public policy and educational initiatives. By supporting students at the K-12, undergraduate, and graduate levels, patrons help cultivate a strong and dynamic talent pool within our community. Patrons enhance the visibility of private enterprises and highlight the vital role they play within the Weather Enterprise. They facilitate government investments in meteorological infrastructure, such as observations, computing, and communications. Patronage accelerates research and development, translating scientific advances into practical services. Corporate Patrons are the pinnacle of partnership with AMS, and have access to even more benefits listed here. The atmosphere is changing—help shape what's next. Contact AMS for more details.

WE LOOK FORWARD TO WORKING WITH YOU

TOGETHER, WE CAN AMPLIFY YOUR LEADERSHIP, EXTEND YOUR REACH, AND CREATE SOLUTIONS THAT MATTER.

We'd love to learn more about your mission—contact AMS to discuss how we can work together to achieve shared success!
