Climate Change and Food Security

January 20, 2016 • 3:00–4:00pm
Senate Russell Office Building, Room 485

Speakers:

• Edward Carr, Director of International Development, Community, and Environment Department
  Clark University

• Bill Easterling, Dean, College of Earth and Mineral Sciences
  The Pennsylvania State University

• Sonali McDermid, Assistant Professor
  New York University

Topic:

Climate change can affect food availability, access, utilization, and the stability of each of these over time. Disruptions at any point can lead to food insecurity through the activities of the food system, including food production, transportation, and storage.

The speakers will discuss the effects of climate change on global food security. They will also discuss the recent report *Climate Change, Global Food Security, and the U.S. Food System*, a peer-reviewed scientific assessment that identifies climate change effects on global food security. The assessment is a contribution to the U.S. National Climate Assessment and was led by the U.S. Department of Agriculture.

Presented by the American Meteorological Society, the American Society of Agronomy, the Crop Science Society of America, and the Soil Science Society of America

*Part of the AMS Capitol Hill Briefing Series*
